2. Citations and explanations (Rule 70.7)

The claimed invention

The claimed invention relates to providing location information of a user equipment.

The following documents were cited in the International Search Report:

D1: US 6169899 A D2: WO 0152569 A

D1 relates to a system and method for providing historical data for location services. D1 discloses a telecommunications system and method for providing location information that consist of either real-time data or historical data when the subscriber requested to be positioned is either absent or not reachable, to a requesting location application. The historical data is preferably stored per subscriber in a database within a serving mobile switching centre/visitor location register (MSC/VLR) following a successful positioning of that subscriber.

D1 uses location information in order to position the subscriber which implies that a previous positioning must have been carried out.

The claimed invention connection uses information determine the location or position of the subscriber. Connection information includes service area identity or a global cell identity which are available within communication system even if \mathbf{no} location request has previously been made.

D2 is considered to merely disclose the state of the art and is not commented on further.
